

THE TEAM

ICT-based Adaptation to Climate Change in Cities

The global program brings together expertise in urban development, climate change adaptation and information and communication technologies (ICT). Together with our partners, we develop, customize and test digital solutions that engage citizens in the co-creation of their cities to achieve urban resilience in Peru, Mexico and India.

Implemented by:

giz Deutsche Gesellschaft
für Internationale
Zusammenarbeit (GIZ) GmbH

On behalf of:

The project is part of the International Climate Initiative (ICI). The Federal Ministry of Environment, Nature Conservation and Nuclear Safety (BMU) supports the initiative on the basis of a decision adopted by the German Bundestag.

WHAT DO WE DO?

SPECIFIC KNOWLEDGE

We offer **guidance** to enable the process of integrating climate change adaptation into urban planning drawing upon digital solutions.

We provide innovative German and international **good practices** and **tools**.

IMPLEMENTATION & UPSCALE

We facilitate **in-situ collaborative processes** to develop, customize, and test digital solutions that increase urban resilience in 3 cities.

We promote knowledge transfer among cities and **upscale into other 3 cities**.

INTERNATIONAL SPREADING

We spread the **knowledge** and **learnings** nationally and internationally.

We support the German Federal Ministry of Environment, Nature Conservation, Construction and Nuclear Safety's commitment to foster an **inclusive, climate compatible and resilient urban development**.

WHERE WE WORK?

WHEN WILL WE DO IT?
